☑ Instructions

The same application is provided. As a manual test engineer for this app, you have been provided some features to test. Manually test the web app by following the list provided:

- **Behavior 1:** Run `npm start` in the terminal and reload the page. Expect the webpage to start with a blank order.
- **Behavior 2:** Type a name and click "Place Order". Expect "Deliver to:" to display the submitted name.
- **Behavior 3:** A blank name will not overwrite the existing name.
- **Behavior 4:** Select a cake type and place the order. Expect "Cake" to display the selected cake type.
- **Behavior 5:** Check some fillings. Expect "Fillings" to display your selected fillings.
- **Behavior 6:** Choose a stack size. Expect "Pancake Count" to display the number equivalent to the stack
